**While** Bio Sculpture has 180 colors available worldwide, you will find different selections in individual countries. Each country chooses their colors according to market preference and seasonal trends. Some countries offer lots of glitter gels, where as the Northern American salons ask for more matte colors. While we unpack our winter clothes, the Southern Hemisphere celebrates the arrival of summer with bright and sunny colors. If you do not see the color you want, ask us and we will try to get it for you

**Did you know** that Bio Sculpture is the only gel that is handled by Bio Sculpture from the beginning right thru to you, the end user? All Bio Sculpture products are manufactured in Bio Sculpture's own factory where only Bio Sculpture is made. That is where it is manufactured, tested, bottled, sealed and packed for export to the local Bio Sculpture office, from where it will be shipped to you, the Bio Sculpture Nail Expert. Bio Sculpture is never passed on to a third party or a beauty supply store. Truly unique in today's world!
